

Maths through the Lotto

I couldn't help but be very happy for the person(s) who won the lotto on Saturday! I don't like to gamble myself and anyway, the

chances of winning are very slim indeed. That's an area of maths called

Probability, which we will leave for another day. Instead we will use the

winning numbers from the Lotto games to do some adding and subtracting

Complete the following tasks below. You can use a calculator but only if you find the going tough

WINNING NUMBERS

BONUS

	Question	Answer
1	Add all the numbers together	
2	Subtract the smallest number from the biggest one	
3	What two numbers add up to 26?	
4	Identify the even numbers	
5	What number is closest to your age?	
6	Add the two blue numbers together	
7	Subtract the bonus number from the total in Q1	
8	Add up all the single digit numbers	
9	Add up all the double digit numbers	
10	What numbers have a difference of 2 between them	

Grocery Shopping

How many supermarkets can you name?

Which supermarket is your favourite? Explain your answer

A slogan is a phrase used by companies are advertising. It helps you remember the company and their products (the things they sell)

Using the supermarkets you have named above, write down the slogan for five of them.

Supermarket	Slogan

Answer the following questions

What word is used to describe the passageway between shelves? _____

The person who calculates how much you owe for your goods? _____

The name given to the foodstuffs you bought? **G** _____

The paper showing what you bought/paid for the goods _____

The d _____ counter is you can buy cooked meats, cheese and salad food.

Spell the object on the left _____

Take a look at your family's last shopping receipt.

Look at each item on the list.

Using the **Grocery Shopping List**, put each item bought under the correct heading.

For example, tinned or canned tuna will go under the list **Canned Foods**.

Reading Comprehension

Shopper shocked after finding tarantula on bunch of bananas

A shopper had a terrifying moment in a branch of Lidl's when he picked up a bunch of bananas and found a huge tarantula clinging onto them.

A spokesman for Lidl said: "I can confirm that an as yet unidentified spider was discovered at our Sydenham store this morning. "

Mark Drinkwater, 42, was left shaken after his encounter with the spider - which he claims was the size of a man's hand.

Staff were called to the fruit counter and they launched a search for it.

Mark, from south-east London, said: "I went into the store and picked up a few items. Then I went to the fruit and vegetable area and picked up some bananas.

"I started to pick them apart and then I realised there was a tarantula hanging from the side of the bananas.

"It was the size of the palm of my hand. It was hairy. It was scary enough. I shook the banana and the tarantula fell back into the box.

"It probably wasn't very happy having been thrown back in the box.

"At the time I didn't panic, I was relatively calm, but later I could feel my heart beating through my chest."

He said he would continue to shop at the store near his home, but added: "I don't think I will be buying bananas for a few weeks."

Staff spent more than ten minutes hunting for the spider. Eventually they trapped it in a Tupperware box and closed the lid.

Answer the following questions on the comprehension

1. What fruit was the man buying? _____

2. What supermarket was he in? _____

3. What did he discover in the fruit section? _____

4. How big did he say it was? _____

5. How would you have felt if it happened to you and why?

6. How do you think the spider got into the fruit?

7. What did staff at the supermarket do with the spider?

8. How long did it take them to find the spider? _____

9. Where in the world do tarantulas normally live? _____

10. Use another word to show you understand the meaning of the words
Clinging: _____
Launched: _____
Realised: _____

11. How many words of **three or more letters** can you make from the word **TARANTULA**. You can only use a letter twice if it occurs twice in the word

Literacy/Numeracy: Mr. Conlon

Student: _____
